

Omer Mandalaoui

Software Developer | Full-Stack • AI • Automation

mandalaoui.omer@gmail.com | 053-822-8882 | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

Computer Science graduate with hands-on experience building and delivering software solutions for business clients. Experienced in full-stack development, APIs, databases, AI integrations, and production deployment, working across the product lifecycle from requirements to delivery.

Experience

Freelance Full-Stack Developer | Self-Employed | 2025–2026

- Built and delivered production web solutions for business clients, from requirements and development through deployment.
- Developed a production platform combining admin tools, lead management, custom business logic, and LLM-powered content automation.
- Built responsive websites for additional clients, focusing on usability, performance, accessibility, and business needs.

Skills

Web & Backend: React, Next.js, Node.js, Express, REST APIs, JWT

Languages: JavaScript, TypeScript, Python, Java, SQL

Databases: MongoDB, PostgreSQL, MySQL

AI & Integrations: OpenAI API, LLM Integration, Workflow Automation

Tools: Docker, Git, GitHub Actions (CI/CD), Vercel, Netlify

Selected Projects

Real Estate Business Platform - Client Project | React, TypeScript, MongoDB, Netlify | [Live](#)

- Built and deployed a full-stack platform for a real-estate business, combining property listings, neighborhood data, market content, lead management, and a custom property valuation tool.
- Developed a secure admin CMS for managing properties and articles, with an LLM-powered content pipeline that automates research, article generation, and publishing workflows.

AIControlCenter - AI Cost & Usage Dashboard | Next.js, TypeScript, Groq | [Live](#) | [GitHub](#)

- Built an AI usage analytics dashboard to track costs, ROI, efficiency, and optimization opportunities across teams.
- Developed deterministic analytics logic and natural-language data queries with structured LLM-generated insights and validation.

WanderWise - AI-Powered Trip Platform | React, Node.js, MongoDB, Docker | [GitHub](#)

- Built a full-stack AI trip-planning platform, developing application logic, backend services, APIs, and data flow.
- Designed validation and output-processing pipelines for generating structured itineraries from user input.

Education

B.Sc. in Computer Science | Bar-Ilan University | 2023–2026

Military Background | IDF – Human Resources Officer | 2019–2022

- Led and mentored officers and soldiers, managing training cycles of up to 150 personnel.
- Managed HR operations for 100+ personnel in high-responsibility environments, developing strong leadership, coordination, and cross-functional communication skills.
